
SENIOR DATA/PLATFORM ENGINEER – CANDIDATE

DATAENG-A5

Profile

Data infrastructure engineer with 11+ years experience building resilient pipelines and optimization systems for logistics, fleet tracking, and demand forecasting.

Experience

Senior Data Engineer, LogiChain GmbH; Nuremberg, Germany — 2017–Present

Built route optimization platform using Python, Redshift, and Airflow. Integrated IoT sensors via MQTT brokers.

ETL Developer, SupplyHub AG; Munich, Germany — 2013–2017

Created batch and stream loaders for order fulfillment and delivery monitoring using Kafka and Flink.

Junior BI Analyst, CargoFlow UG; Erlangen, Germany — 2011–2013

Wrote dashboards and KPIs in Metabase and performed SQL-driven optimizations for delivery SLAs.

Education

FAU Erlangen-Nürnberg, Nürnberg — M.Sc. Information Engineering, 2011

Technical University of Sofia, Sofia — B.Sc. Computer Control Systems, 2008

Skills

Airflow, Redshift, Kafka, Flink, Python, Metabase, MQTT, ETL, SQL, IoT Integration

Awards

Logistics Data Specialist – MITx | Airflow DAG Architect | Kafka Stream Processing Professional
